

Muhammad Farrel Nayaka

Technical Project Manager | Full-Stack Developer | Quality Assurance Specialist
Tangerang, Banten, Indonesia • [linkedin.com/in/farrel-nayaka-87a776278](https://www.linkedin.com/in/farrel-nayaka-87a776278) • github.com/FarrelNayakaaa

PROFILE

Informatics student and Technical Project Manager drawn to the intersection of software engineering, product thinking, and quality assurance. Genuinely interested in Web3 and full-stack development, and enjoys the craft of QA, digging into edge cases and turning ambiguity into structured test coverage. Motivated by cross-functional teamwork, and by translating technical decisions into reliable, user-centered outcomes.

EDUCATION

Bachelor of Computer Science (Informatics) — Multimedia Nusantara University (UMN), Tangerang, Indonesia · GPA 3.82/4.00 · Current

WORK EXPERIENCE

Project Manager — Waverly Team (TEKNOFEST Turkey Web3 Hackathon) *Apr 2026 – Present*

- Lead a 4-person cross-functional team building a Web3 platform, now advancing toward the competition's final round.
- Align frontend developers and smart contract engineers through Agile ceremonies to keep delivery on track with hackathon milestones.

Quality Assurance Intern — PT Global Loyalty Indonesia (Alfagift) *Jan 2026 – Present*

- Write 50–100 test scenarios per release and catch 50+ bugs across 2 major releases of the 'My Lawson Revamp' app, tracked in Qase.io and Jira.
- Own the staging environment end-to-end, helping the team hit its TO (beta check) checkpoints faster.
- Validate backend APIs and databases with Postman and DBeaver; manage build shipments and regression testing via TestFlight.

Technical Project Manager & Product Designer — Starlight 2025 (Event Platform Website) *Jan 2026 – Nov 2026*

- Lead a 7-person team (incl. 2 coordinators) through an 11-month lifecycle, from stakeholder requirements to live deployment.
- Design the user journeys, wireframes, and database schema behind 200+ successful ticket transactions.
- Drive responsive CRUD development and content architecture built for high-volume public traffic.

Operating System Lab Assistant — Multimedia Nusantara University *Feb – Jul 2025*

- Mentored 40 undergraduates in process scheduling, thread management, and memory architecture, rated highly by all 40 students.
- Created debugging exercises and problem-solving frameworks that strengthened students' low-level programming skills.

KEY PROJECTS

AntriDok — Clinic Mobile Queue System

- Co-built a native Kotlin app with a 3-person team to streamline public clinic queues.
- Designed accessibility-first navigation for elderly users, cutting checkout friction.

Virtual Try-On App

- Designed the full user flow and high-fidelity Figma prototypes for a virtual fitting-room concept.
- Validated the design with usability feedback from 35+ live participants at a campus exhibition.

Catch ME! — Survival Game (itch.io/farrelnayakaa)

- Designed the in-game HUD, typography, and asset states as UI/UX lead on a 3-person team.
- Published and localized the game on itch.io.

CORE SKILLS

Development Python, Kotlin, JavaScript, React, PostgreSQL, MongoDB

QA & Testing Postman, DBeaver, TestFlight, Jira, Qase.io

Design Figma, High-Fidelity Prototyping, Usability Testing, Accessibility Design

Management Technical Project Management, Agile/Scrum, Cross-Functional Leadership
