

Muhammad Farrel Nayaka

Technical Project Manager | Full-Stack Developer | Quality Assurance Specialist

Tangerang, Banten, Indonesia • [linkedin.com/in/muhammad-farrel](#) • [github.com/FarrelNayakaaa](#) • [itch.io/farrelnayakaa](#)

PROFESSIONAL SUMMARY

Informatics student and Technical Project Manager with hands-on experience across Software Engineering, UI/UX Design, and Quality Assurance. Led a 4-person team through an international Web3 hackathon (TEKNOFEST Turkey) currently advancing toward the final round, managed end-to-end delivery of a campus event platform processing 200+ ticket transactions, and identified 50+ bugs during a QA internship at a high-traffic consumer app (Alfagift). Combines technical execution with product thinking and cross-functional leadership to deliver reliable, user-centered solutions.

EDUCATION

Bachelor of Computer Science (Informatics) — Multimedia Nusantara University (UMN), Tangerang, Indonesia • GPA 3.73/4.00 Current

WORK EXPERIENCE

Project Manager — **Waverly Team (TEKNOFEST Turkey Web3 Hackathon)** Apr 2026 – Present

- Leading a 4-person cross-functional team through a 4-month development cycle (ongoing) for a Web3 platform, currently advancing toward the competition's final round.
- Coordinating alignment between frontend developers and smart contract engineers using Agile frameworks to keep delivery on pace with hackathon milestones.

Quality Assurance Intern — **PT Global Loyalty Indonesia (Alfagift)** Feb 2025 – Nov 2025

- Authored 50–100 test scenarios and identified 50+ bugs across 2 major releases of the 'My Lawson Revamp' mobile application, using Qase.io and Jira for tracking.
- Owned the staging environment end-to-end, helping accelerate the team's progress toward TO (beta check) checkpoints.
- Conducted backend API and database validation using Postman and DBeaver, and managed build shipments and regression cycles via TestFlight.

Technical Project Manager & Product Designer — **Starlight 2025 (Event Platform Website)** Jan 2026 – Present

- Leading a 7-person team (including 2 coordinators) through a 9-month product lifecycle, from stakeholder requirements to live deployment, for a campus talent-competition ticketing platform.
- Designed user journeys, wireframes, and relational database schemas supporting 200+ successful ticket transactions.
- Oversaw responsive CRUD development and content architecture for high-volume public access.

Operating System Lab Assistant — **Multimedia Nusantara University** Aug 2023 – Present

- Mentored 70+ undergraduate students in process scheduling, thread management, and memory architecture over one semester, earning a 95/100 assistant performance evaluation.
- Built debugging exercises and problem-solving frameworks to strengthen students' low-level programming fundamentals.

KEY PROJECTS

AntriDok — Clinic Mobile Queue System

- Co-developed a native Kotlin mobile app with a 3-person team over one semester to streamline public clinic queues.
- Designed accessibility-first navigation tailored for elderly users to reduce checkout friction.

Virtual Try-On App

- Designed the complete user flow, interaction states, and high-fidelity Figma prototypes for a virtual fitting-room concept, exhibited at a campus showcase.
- Gathered usability feedback from 35+ live participants at the exhibition to validate the interaction design.

Catch ME! — Survival Game ([itch.io/farrelnayakaa](#))

- Served as UI/UX designer on a 3-person team, building in-game HUD, typography, and asset states for real-time player feedback.
- Published and localized the game on itch.io.

CORE SKILLS

Development	Python, Kotlin, JavaScript, React, PostgreSQL, MongoDB
QA & Testing	Postman, DBeaver, TestFlight, Jira, Qase.io
Design	Figma, High-Fidelity Prototyping, Usability Testing, Accessibility Design
Management	Technical Project Management, Agile/Scrum, Cross-Functional Leadership
